Introduction

Santander UK Group Holdings plc's Additional Capital and Risk Management Disclosures for the six months ended 30 June 2024 should be read in conjunction with our 2024 Half Yearly Financial Report.

As a wholly-owned large subsidiary of Banco Santander, S.A., under the retained EU law version of Capital Requirements Regulation (UK CRR) Santander UK Group Holdings plc (the Company) is required to produce and publish annually a specified number of Pillar 3 disclosures. In accordance with the European Banking Authority (EBA) guidelines on disclosure frequency^[1], the Company has assessed the need to publish capital-related disclosures more frequently than annually and the disclosures deemed appropriate for more frequent publication have been included in the additional capital disclosures set out in this document. All disclosures within Part 1 of this document on pages 2 to 31 cover the consolidated Santander UK Group Holdings plc group position.

The Company is the immediate parent company of Santander UK plc, a Ring-Fenced Bank (RFB) and associated controlled entities and is the head of the Santander UK group for regulatory capital and leverage purposes. Part 2 of this document on pages 32-55 includes a specified number of Pillar 3 disclosures in accordance with the EBA guidelines on disclosure frequency for the Santander UK plc group, which are similar to those for the Company.

Retained EU Law disclosures

This document contains disclosures required under UK CRR for the Company as a large subsidiary of an EU parent undertaking, some of which are not disclosed in the 2024 Half Yearly Financial Report. All disclosures cover the 30 June 2024 position or movement during 2024.

^[1] EBA guidelines on materiality, proprietary and confidentiality and on disclosure frequency are under Articles 432(1), 432(20) and 433 of Regulation (EU) No 575/2013.

Additional Capital and Risk Management Disclosures for Santander UK Group Holdings plc group

EXECUTIVE SUMMARY

COMMON EQUITY TIER 1 (CET1) RATIO

The CET1 capital ratio remained stable at 15.2% following accrued profits of £597m offset by £556m interim dividends paid in Jun-24.

TOTAL CAPITAL RATIO

Total capital ratio decreased to 21.3% (Dec-22: 21.4%) due to lower AT1 capital and following accrued profits of £597m offset by £556m interim dividends paid in Jun-24.

UK LEVERAGE RATIO

UK Leverage ratio decreased to 4.9% (Dec-23: 5.1%) due to the slight increase in UK Leverage exposure to £251.4bn (Dec-23: £247.2bn) as a result of the return to normalisation of liquidity levels.

RISK-WEIGHTED ASSETS (RWAs) £bn

RWAs decreased slightly following securitisation activities.

Key Movements

CET1 capital ratio of 15.2% (Dec-23: 15.2%) and UK leverage ratio of 4.9% (Dec-23: 5.1%), are well above minimum requirements. The CET1 capital ratio remained stable at 15.2% following accrued profits of £597m offset by £556m interim dividends paid in Jun-24. UK Leverage ratio decreased to 4.9% (Dec-23: 5.1%) due to the slight increase in UK Leverage exposure to £251.4bn (Dec-23: £247.2bn) as a result of the return to normalisation of liquidity levels. RWAs decreased slightly following securitisation activities. We remain very strongly capitalised with significant headroom to minimum requirements and MDA.

¹ Liquidity metrics is now reported for Santander UK, our Holding Company, from 1 January 2022 following adoption of CRR2 regulation.

10 Common Equity Tier 1 (as a percentage of risk exposure amount) as if IFRS 9 or analogous ECLs transitional arrangements had not been applied	15.2%
11 Tier 1 (as a percentage of risk exposure amount)	18.3%
12 Tier 1 (as a percentage of risk exposure amount) as if IFRS 9 or analogous ECLs transitional arrangements had not been applied	18.3%
13 Total capital (as a percentage of risk exposure amount)	21.3%
14 Total capital (as a percentage of risk exposure amount) as if IFRS 9 or analogous ECLs transitional arrangements had not been applied	21.2%
Leverage ratio[1]	
15 Leverage ratio total exposure measure	282,866
16 Leverage ratio	4.4%
17 Leverage ratio as if IFRS 9 or analogous ECLs transitional arrangements had not been applied	4.4%

The Company is applying the IFRS 9 capital transitional arrangements set out in the onshored versions of EU Regulation 2017/2 395 and EU Regulation 2020/873 that amend the Capital Requirements Regulation. Under the transitional arrangements, the Company is entitled to mitigate the effect to capital of Expected Credit Loss-based provisioning following the implementation of IFRS 9. The transitional arrangements will end on 31st December 2024 with the amount of capital relief available having reduced each year by a transitional factor. The transitional factor for 2024 is 25 percent which applies to post 1 January 2020 provision movements.

The capital relief affects both the capital base and RWAs reported by the Company. The adjustment to CET1 capital is now comprised of a dynamic element only, having previously been comprised of a static element and a dynamic element. The dynamic element is based on the capital impact of the change in provision levels post 1 January 2020. In addition to this adjustment, the transitional arrangements also reduce associated capital position impacts for exposures modelled under the Standardised Approach for Credit Risk and Tier 2 capital from an excess of provisions over expected losses for exposures modelled using the Internal Ratings-Based approach.

[1] This is the UK Leverage ratio which includes claims on central banks.

UK LRA: Disclosure of LR qualitative information

<p>Description of the processes used to manage the risk of excessive leverage</p> <p>The leverage ratio for the UK consolidated group is monitored and reported to Capital Committee and other governance bodies and is included in the group's Risk Appetite framework. The current level of the leverage ratio and forecast levels of the leverage ratio under a range of macroeconomic scenario, including stress scenarios, are considered. Under the Risk Appetite framework, limits and alert levels for the leverage ratio have been set to ensure that leverage is maintained at acceptable levels and in excess of minimum regulatory requirements.</p>

LIQUIDITY METRICS EXECUTIVE SUMMARY

LIQUIDITY COVERAGE RATIO - SPOT

The LCR requirement (weighted) is broadly consistent over time, driven mainly by deposits. Corporate deposits contribute a greater requirement despite Retail deposits being significantly larger in number, as a result of the standardised LCR weightings.

LIQUIDITY COVERAGE RATIO – AVERAGE

HQLA increased marginally as a result of lending reductions offset by reduction of deposits and TFSME repayments. The LCR maintains a significant surplus to both internal and regulatory requirements.

NET STABLE FUNDING RATIO

The composition of the balance sheet has remained consistent year on year resulting in the NSFR ratio remaining broadly in line with 2023.

SPLIT OF LIQUIDITY ASSET BUFFER

Dec 2023

June 2024

The liquidity buffer is largely comprised (>95%) of Level 1 assets, primarily cash held in our Bank of England Reserve Account.

Qualitative information on LCR (LIQB)

<p>Explanations on the main drivers of LCR results and the evolution of the contribution of inputs to the LCR's calculation over time</p> <p>The LCR requirement (weighted) is broadly consistent over time, driven mainly by deposits. Corporate deposits contribute a greater requirement despite Retail deposits being significantly larger in number, as a result of the standardised LCR weightings. The 12-month average HQLA was broadly flat in the period. The LCR maintains a significant surplus to both internal and regulatory requirements.</p>
<p>Explanations on the changes in the LCR over time</p> <p>The 12-month average LCR of 157% reflects our continued strong liquidity position.</p>
<p>Explanations on the actual concentration of funding sources</p> <p>Santander UK is largely funded through customer deposits (£188bn), with the significant proportion being Retail, we leverage our large and diverse customer base to offer products that give us a long-term sustainable source of funding and c86% of our core retail liabilities are covered by the FSCS guarantee. We also have c£53bn of wholesale funding which includes secured, unsecured term funding as well as c£13bn of TFSME Funding.</p>
<p>High-level description of the composition of the institution's liquidity buffer.</p> <p>The liquidity buffer is largely comprised (c94%) of Level 1 assets, primarily cash held in our Bank of England Reserve Account.</p>
<p>Derivative exposures and potential collateral calls</p> <p>The main drivers of derivative exposures / potential collateral calls are the Historic Look Back Approach (HLBA) to calculating collateral requirements in the LCR and collateral outflows due to counterparties in the event of a three-notch downgrade.</p>
<p>Currency mismatch in the LCR</p> <p>We have no material mismatch in our currency LCRs, with most of the funding raised in currency swapped back to GBP and the remainder being used to fund structural currency assets.</p>
<p>Other items in the LCR calculation that are not captured in the LCR disclosure template but that the institution considers relevant for its liquidity profile</p> <p>n/a</p>

Own Funds disclosure – balance sheet reconciliation

The scope of consolidation and method for consolidation of the Company's balance sheet is substantially the same as that used for regulatory purposes. A reconciliation of regulatory own funds to the relevant balance sheet items for the Company is included in the table below at 30 June 2024. This outlines the impact of the difference in scope of consolidation outlined above:

Reconciliation of regulatory own funds to balance sheet in the audited financial statements (CC2)

The scope of consolidation and method for consolidation of the Company's balance sheet is substantially the same as that used for regulatory purposes. A reconciliation of regulatory own funds to the relevant balance sheet items for the Company is included in the table below 30 June 2024. This outlines the impact of the difference in scope of consolidation outlined above:

The main difference between the balance sheet published per the financial statements and the balance sheet under the regulatory scope of consolidation relates to the adjustments required to convert the joint ventures in Consumer Finance from the equity method consolidation to full consolidation in addition to eliminating the intragroup balances between the Company and these Joint ventures.

¹ The references describe regulatory balance sheet components that link initially to items disclosed in table CC1, prior to the application of regulatory definitions and adjustments per the rules for calculating own funds.

June 2024 Additional Capital and Risk Management Disclosures for Santander UK plc Group

Introduction

As a wholly-owned large subsidiary under UK CRR, Santander UK plc (the RFB) is required to produce and publish annually a specified number of Pillar 3 disclosures rather than a complete set of Pillar 3 disclosures. In accordance with the EBA guidelines on disclosure frequency¹, the RFB has assessed the need to publish capital-related disclosures more frequently than annually, and the disclosures deemed appropriate for more frequent publication have been included in the additional capital disclosures set out in this document. All disclosures cover the consolidated RFB Group position.

¹ EBA guidelines on materiality, proprietary and confidentiality and on disclosure frequency are under Articles 432(1), 432(20) and 433 of Regulation (EU) No 575/2013.

Key Movements

CET1 capital ratio of 15.4% (Dec-23: 15.4%) and UK Leverage ratio of 4.9% (Dec-23: 5.1%), are well above minimum requirements. The CET1 capital ratio remained stable at 15.4% following accrued profits of £600m offset by £554m interim dividends paid in Jun-24. UK Leverage ratio decreased to 4.9% (Dec-23: 5.1%) due to the slight increase in UK Leverage exposure to £247.3bn (Dec-23: £242.9bn) as a result of the return to normalisation of liquidity levels. RWAs decreased slightly following securitisation activities. We remain very strongly capitalised with significant headroom to minimum requirements and MDA.

IFRS 9 Transitional Arrangements (IFRS9 – FL)

The following table summarises the impact of IFRS 9 transitional arrangements at 30 June 2024 over the full allowable period:

15 Leverage ratio total exposure measure	275,634
16 Leverage ratio	4.4%
17 Leverage ratio as if IFRS 9 or analogous ECLs transitional arrangements had not been applied	4.4%

The RFB group is applying the IFRS 9 capital transitional arrangements set out in the onshored versions of EU 2017/2395 and EU Regulation 2020/873 that amend the Capital Requirements Regulation. Under the transitional arrangements, the Company is entitled to mitigate the effect to capital of Expected Credit Loss-based provisioning following the implementation of IFRS 9. The transitional arrangements will end on 31st December 2024 with the amount of capital relief available having reduced each year by a transitional factor. The transitional factor for 2024 is 25 percent which applies to post 1 January 2020 provision movements.

The capital relief affects both the capital base and RWAs reported by RFB group. The adjustment to CET1 capital is now comprised of a dynamic element only, having previously been comprised of a static element and a dynamic element. The dynamic element is based on the capital impact of the change in provision levels post 1 January 2020. In addition to this adjustment, the transitional arrangements also reduce associated capital position impacts for exposures modelled under the Standardised Approach for Credit Risk and Tier 2 capital from an excess of provisions over expected losses for exposures modelled using the Internal Ratings-Based approach.

[1] This is the UK Leverage ratio which includes claims on central banks.

UK LRA: Disclosure of LR qualitative information**Description of the processes used to manage the risk of excessive leverage**

The leverage ratio for the RFB group is monitored and reported to Capital Committee and other governance bodies and is included in the RFB's Risk Appetite framework. The current level of the leverage ratio and forecast levels of the leverage ratio under a range of macroeconomic scenario, including stress scenarios, are considered. Under the Risk Appetite framework, limits and alert levels for the leverage ratio have been set to ensure that leverage is maintained at acceptable levels and in excess of minimum regulatory requirements.

Description of the factors that had an impact on the leverage ratio during the period to which the disclosed leverage ratio refers

The Leverage ratio for the RFB group remained broadly stable at 4.9% (Mar-24: 5.1%). UK Leverage exposure broadly stable at £247.3bn (Mar-24: £243.2bn).

Qualitative information on LCR (LIQB)

<p>Explanations on the main drivers of LCR results and the evolution of the contribution of inputs to the LCR's calculation over time</p> <p>The LCR requirement (weighted) is broadly consistent over time, driven mainly by deposits. Corporate deposits contribute a greater requirement despite Retail deposits being significantly larger in number, as a result of the standardised LCR weightings. The 12-month average HQLA was broadly flat in the period. The LCR maintains a significant surplus to both internal and regulatory requirements.</p>
<p>Explanations on the changes in the LCR over time</p> <p>The 12-month average LCR of 153% reflects our continued strong liquidity position.</p>
<p>Explanations on the actual concentration of funding sources</p> <p>Santander UK is largely funded through customer deposits (£188bn), with the significant proportion being Retail, we leverage our large and diverse customer base to offer products that give us a long-term sustainable source of funding and c86% of our core retail liabilities are covered by the FSCS guarantee. We also have c£53bn of wholesale funding which includes secured, unsecured term funding as well as c£13bn of TFSME Funding.</p>
<p>High-level description of the composition of the institution's liquidity buffer.</p> <p>The liquidity buffer is largely comprised (c94%) of Level 1 assets, primarily cash held in our Bank of England Reserve Account.</p>
<p>Derivative exposures and potential collateral calls</p> <p>The main drivers of derivative exposures / potential collateral calls are the Historic Look Back Approach (HLBA) to calculating collateral requirements in the LCR and collateral outflows due to counterparties in the event of a three-notch downgrade.</p>
<p>Currency mismatch in the LCR</p> <p>We have no material mismatch in our currency LCRs, with most of the funding raised in currency swapped back to GBP and the remainder being used to fund structural currency assets.</p>
<p>Other items in the LCR calculation that are not captured in the LCR disclosure template but that the institution considers relevant for its liquidity profile</p> <p>n/a</p>

Reconciliation of regulatory own funds to balance sheet in the audited financial statements (CC2)

The scope of consolidation and method for consolidation of the RFB Group balance sheet is substantially the same as that used for regulatory purposes.

A reconciliation of regulatory own funds to the relevant balance sheet items for the RFB Group is included in the table below at 30 June 2024. This outlines the impact of the difference in scope of consolidation outlined above:

The main difference between the balance sheet published per the financial statements and the balance sheet under the regulatory scope of consolidation relates to the adjustments required to convert the joint ventures in Consumer Finance from the equity method consolidation to full consolidation in addition to eliminating the intragroup balances between the Company and these Joint ventures.

¹ The references describe regulatory balance sheet components that link initially to items disclosed in table CC1, prior to the application of regulatory definitions and adjustments per the rules for calculating own funds.

Glossary

Advanced Internal Ratings Based Approach (AIRB)	A method of calculation using internal estimates for all risk components.
Basel III	In December 2010, the Basel Committee on Banking Supervision issued the Basel III rules text, which presents the details of strengthened global regulatory standards on bank capital adequacy and liquidity. The standards were implemented in the EU in January 2014.
Capital Conservation Buffer	A capital buffer required under Basel III to ensure banks build up capital buffers outside of periods of stress.
Common Equity Tier 1 (CET1) capital	The called-up share capital and eligible reserves less deductions calculated in accordance with the UK CRR implementation rules as per the PRA Policy Statement PS7/13. CET1 capital ratio is CET1 capital as a percentage of risk-weighted assets.
Common Equity Tier 1 ratio	CET1 capital as a percentage of risk weighted assets.
Countercyclical capital buffer (CCyB)	A capital buffer required under Basel III to ensure that capital requirements take account of the macro-financial environment in which banks operate.
Counterparty credit risk	A subset of credit risk and is the risk that a counterparty defaults.
UK CRR	An EU legislative package covering prudential rules for banks, building societies and investment firms.
Credit Conversion Factor (CCF)	An estimate of the amount Santander expects a customer to have drawn further on a facility limit at the point of default.
Credit Risk	The risk that a counterparty will default and will be unable to fulfil the obligations of their contract.
Credit Valuation Adjustment (CVA)	Adjustments to the fair values of derivative assets to reflect the creditworthiness of the counterparty.
EU Banking Group	Banco Santander group, a leading and commercial bank headquartered in Spain.
Expected Loss (EL)	The Santander UK Group Holdings plc group measure of anticipated loss for exposures captured under an internal ratings-based credit risk approach for capital adequacy calculations. It is measured as the Santander UK Group Holdings plc group-modelled view of anticipated loss based on Probability of Default, Loss Given Default and Exposure at Default, with a one-year time horizon.
Exposure	The maximum loss that a financial institution might suffer if a borrower, counterparty or group fails to meet their obligations or assets and off-balance sheet positions must be realised.
Exposure at Default (EAD)	The estimation of the extent to which the Santander UK Group Holdings plc group may be exposed to a customer or counterparty in the event of, and at the time of, that counterparty's default. At default, the customer may not have drawn the loan fully or may already have repaid some of the principal, so that exposure is typically less than the approved loan limit.
Fair Value	The value of an asset or liability when the transaction is on an arm's length basis.
Financial Policy Committee	An independent committee at the Bank of England with the objective of overseeing and taking action to remove or reduce systemic risks to protect and enhance the resilience of the UK financial system.
Foundation Internal Ratings Based Approach (FIRB)	A method of calculation for credit risk capital requirements using internal estimate of PD with supervisory estimates for LGD and supervisory calculations for EAD.
Global Systemically Important Bank (G-SIB)	G-SIBs are subject to higher capital buffer requirements, total loss-absorbing capacity requirements, resolvability requirements and higher supervisory expectations and have been phased in from 1 January 2016.
Institution	An investment firm or credit institution.
Internal Models Approach (IMA)	Approved by the PRA this model is used to calculate market risk capital and RWA.
Internal Ratings-Based Approach (IRB)	The Santander UK Group Holdings plc group's method, under the UK CRR framework, for calculating credit risk capital requirements using the Santander UK Group Holdings plc group's internal Probability of Default models but with supervisory estimates of Loss Given Default and conversion factors for the calculation of Exposure at Default.
Leverage Ratio	UK CRR end-point Tier 1 capital divided by exposures as defined by the European Commission Delegated Regulation 2015/62 of October 2014. In July 2016, the definition was amended to exclude from the calculation for total exposure those assets held against central banks that are matched by deposits in the same currency and of equal or longer maturity.
Loss Given Default (LGD)	The fraction of Exposure at Default that will not be recovered following default. LGD comprises the actual loss (the part that is not recovered), together with the economic costs associated with the recovery process.
Mark-to-Market Approach	An approach available to banks to calculate the exposure value associated with derivative transactions.
Market Risk	The risk of loss of earnings or economic value due to adverse changes in the financial market.
Maturity or Residual Maturity (for RWAs)	Remaining time until a transaction expires.
Minimum Capital Requirement	Minimum capital required for credit, market and operational risk.
Multilateral Development Banks	An institution created by a group of countries to provide financing for the purpose of development.
Operational Risk	The risk of loss due to the failure of people, process or technology.
Pillar 1	The first pillar of the Basel III approach which provides the approach to the calculation of the minimum capital requirements. This is 8% of the banks risk-weighted assets.
Pillar 3	The part of the UK CRR Accord which sets out the disclosure requirements for firms to publish details of their risks, capital and risk management. The aims are greater transparency and strengthening market discipline.
Probability of Default (PD)	The degree of likelihood that the counterparty fails to meet their financial obligation, within a period of one year.
Prudential Regulation Authority (PRA)	The UK financial services regulator formed as one of the successors to the FSA. The PRA is part of the Bank of England and is responsible for the prudential regulation and supervision of banks, building societies, credit unions, insurers and major investment firms. It sets standards and supervises financial institutions at the level of the individual firm.
Prudential Valuation Adjustment (PVA)	These are adjustments to the tier 1 capital where the prudent value of the position in the trading book is seen by the banks being below the fair value recognised in the financial statements.
Regulatory Capital	The amount of capital that the Santander UK Group Holdings plc group holds, determined in accordance with rules established by the UK PRA for the consolidated Santander UK Group Holdings plc group and by local regulators for individual Santander UK Group Holdings plc group companies.
Repurchase Agreement (repo)/Reverse Repurchase Agreement (reverse repo)	In a sale and repurchase agreement one party, the seller, sells a financial asset to another party, the buyer, under commitments to reacquire the asset at a later date. The buyer at the same time agrees to resell the asset at the same later date. From the seller's perspective such agreements are securities sold under repurchase agreements (repos) and from the buyer's securities purchased under commitments to resell (reverse repos).
Retail Internal Ratings Based Approach (Retail IRB)	The Santander UK Group Holdings plc group's internal method of calculating credit risk capital requirements for its key retail portfolios. The FSA approved the Santander UK Group Holdings plc group's application of the Retail IRB approach to the Santander UK Group Holdings plc group's credit portfolios with effect from 1 January 2008.
Risk-Weighted Assets (RWAs)	A measure of a bank's assets adjusted for their associated risks. Risk weightings are established in accordance with the Basel Capital Accord as implemented by the PRA.
RWA Density	The risk-weighted asset divided by exposure at default.
Securities Financing Transactions (SFT)	Transactions involving repurchase agreements and reverse repurchase agreements, stock borrowing and other securities.
Securitisation Positions	The position assumed by the bank following the purchase of certain structured securities.

Specialised Lending	An exposure to an entity which was created specifically to finance and/or operate physical assets, where the contractual arrangements given the lender a substantial degree of control over the assets and the income that they generate and the primary source of repayment of the obligation is the income generated by the assets being financed.
Standardised Approach	In relation to credit risk, a method for calculating credit risk capital requirements under UK CRR, using External Credit Assessment Institutions ratings and supervisory risk weights. The Standardised approach is less risk-sensitive than IRB (see 'IRB' above). In relation to operational risk, a method of calculating the operational capital requirement under UK CRR, by the application of a supervisory defined percentage charge to the gross income of eight specified business lines.
Tier 1 Capital	A measure of a bank's financial strength defined by the PRA. It captures Core Tier 1 capital plus other Tier 1 securities in issue but is subject to a deduction in respect of material holdings in financial companies.
Tier 1 Capital ratio	The ratio expresses Tier 1 capital as a percentage of risk weighted assets.
Tier 2 Capital	Defined by the PRA. Broadly, it includes qualifying subordinated debt and other Tier 2 securities in issue, eligible collective impairment allowances, unrealised available for sale equity gains and revaluation reserves. It is subject to deductions relating to the excess of expected loss over regulatory impairment allowance, securitisation positions and material holdings in financial companies.
Trading Book	Positions in financial instruments held either with trading intent or in order to hedge other elements of the trading book, which must be free of restrictive covenants on their tradability or ability to be hedged.
Value at Risk (VaR)	An estimate of the potential loss which might arise from market movements under normal market conditions, if the current positions were to be held unchanged for one business day, measured to a confidence level.
